ASHLEY LIM CHIA WEI

AI Automation Developer · LLM Tools for Technical SEO

SUMMARY

AI automation developer building LLM-powered tools with the Anthropic Claude API, Claude Code and Python. At an SEO agency, built two end-to-end LLM tools: a multi-page JSON-LD schema generator grounded in live page content, and an automated technical SEO auditor that pairs Google APIs with pre-written, tested compliance checks to catch and fix schema, metadata and Core Web Vitals errors that break current Google standards and erode domain trust and rankings. Focused on making LLM output reliable enough for client work, through grounding in source data, validation against external specs and structured, reviewable reports.

TECHNICAL SKILLS

- **LLM & AI:** Anthropic Claude API, Claude Code (custom skills, project instructions, slash commands), Claude Projects, prompt engineering, output grounding to prevent hallucination, structured output generation (JSON-LD, HTML).
- **Programming & APIs:** Python, REST API integration, Google APIs (e.g. PageSpeed Insights, Chrome UX Report (CrUX) API), HTML parsing, JSON.
- **Domain Expertise:** Technical SEO auditing, Schema.org & Google Rich Results requirements, Core Web Vitals (LCP, INP, CLS) diagnosis (LCP breakdown, render-blocking resources, lazy-loading, fetchpriority, CrUX field data), CDN & page caching analysis, GTM/GA4 duplicate tag tracing, meta optimization, Google Analytics 4.

EXPERIENCE

Newnormz SEO Agency - Technical SEO Executive **Jul 2026 - Sep 2026**

Schema Markup Generator ***Claude, Python***

- Built an LLM tool that analyzes any domain's target pages and generates a multi-tab HTML report, one tab per page, with dropdowns for each individual JSON-LD schema markup.
- Grounded every schema field in the live page's content, eliminating hallucinated and placeholder values, and built each markup to meet Google Rich Results requirements.

  Impact: 10 minutes for an 11-page domain, saved 2 days of manual schema creation

Automated Technical SEO Auditor ***Claude Code, Claude API, Google APIs***

- Built a Claude Code workflow that audits any domain and its target pages on the live site, detecting schema markup, meta title and description, and all Core Web Vitals errors.

  Generates Google-compliant fixes for every issue found and compiles them into a full per-page audit report.

  [Impact: audit time per domain of 10-20 target pages cut from 5 hours to 45 minutes

MC Crenergy (DATANORY) - Junior Marketing Executive **Oct 2025 - Jun 2026**

- Analyzed GA4 event data (scroll depth, conversion events) to guide content optimization, growing average weekly website traffic by 36.4% in 6 months and WhatsApp click-throughs from 0 to 15-30 per optimized article.
- Owned CRM data hygiene, scrubbing legacy records to improve targeting accuracy for inbound campaigns.

CERTIFICATIONS

Semrush AI Technical SEO Certification · Google Analytics 4 (GA4) Certified

EDUCATION

Tenby Setia Eco Park - A-levels (Biology, Mathematics, Chemistry) **2022 - 2024**
